

600W INFRARED HEATING PANEL 1005*595

SKU Code: IH1004 (for recessed)
EAN Code: 7103353072878

1005-595 Complete Infrared Heating Panel 600W-Aluminum Frames Insulation Layer Back Plate Power Cable Packing

Description

Heat your home in the most modern way possible thanks to the introduction of IR panel heaters. These infrared heaters are designed to fit into a wide range of areas such as suspended ceilings and into your living room.

Featuring dimensions of 1005 x 595mm, the Classic White 600W Infrared Heating Panel is perfect for installations into suspended ceilings, like what is found in offices and other commercial buildings.

Set up is also a lot easier than traditional central heating system, with each infrared panel requiring a 240V AC feed straight into it by the supplied 3-Pin Plug. Each fitting consumes a modest 600W as well, meaning you recoup the set up costs at an alarming rate.

You needn't worry about burning yourself or anyone around you with your infrared heater, as each panel surface temperature is limited to 115°C. This means that despite providing heat around the room, it still runs at a temperature that allows you to get close to them.

Be aware, they are still too hot to hold on to, so if you wish to move them, please wait until they are at a cool enough temperature.

This infrared heating panel is also IP44 rated, meaning that cleaning it isn't a problem and you can simply wipe whatever marks or stains you have on their.

Features

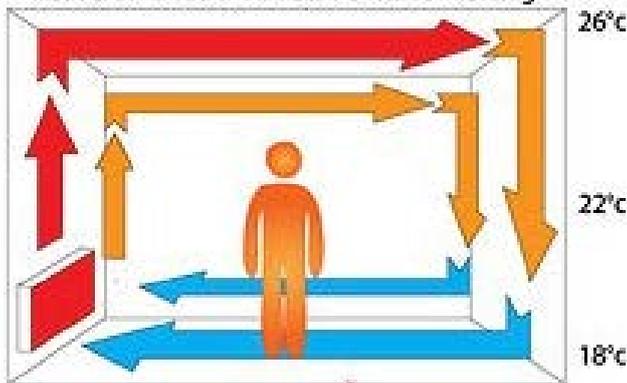

Add some discreet heating to your home with the Standard 600W Infrared Heating Panel with 1005 x 600 size.

- Infrared heating is 100% natural, safe, highly efficient and CO2 free.
- There are no maintenance costs by using them (up to 70% less cost than with central heating).
- They can reach a surface temperature of 115°C, ensuring an optimum comfort level.
- They will integrate beautifully regardless of your interior decor, be it home or office while they make no noise, so they remain unnoticed.

Surface Temperature	115°C
Dimensions (mm)	1005mm x 595mm x 22mm
Recommended Fixing	Wall/Ceiling
Voltage	230v
Wattage	600w
Warranty	3 Years

Infrared heating has many advantages over traditional wet radiators...

- Infrared is cheap to run, saving you money on your fuel bills
- Its easy to retro install, saving time, money and disruption
- Panels can be fitted high on the wall or on the ceiling to free up floor space
- Panels look good and do not easily damage or mark as a radiator might
- Infrared is energy efficient to do your bit to save the planet
- Radiant warmth feels comfortable and gentle
- Panels do not create air currents, dust or harbour germs
